

Scanning for (Bullish) Plays

- 1) Stocks can correct through price or time. As such, there are ultimately only two patterns to look for:
 - A. Buy Setups (i.e., pullbacks)
 - B. Base Breakouts
- 2) The stock must be above a 45° degree 20ma that is above the 200ma.
- 3) The stock has no resistance to the left (Tradable Void).
- 4) Best if the stock is gapping on daily chart...
- 5) The stock has momentum (not red-green, red-green).
- 6) Sideways all day, stay away....
- 7) The Stock has enough reward to risk (R:R > 2:1).
- 8) Lastly, don't ignore your intuition, your feel for the stock and the next likely move!
